

SUSTAINABILITY REPORT 2025

INTRODUCTION

*****'s commitment to sustainability

At *****, sustainability isn't just a trend - it's a responsibility. We are dedicated to making a positive impact on the environment while providing high-quality promotional merchandise that aligns with our customers' values. Through our StepForward pledge, sustainable sourcing, and responsible business practices, we are taking active steps towards a greener future.

StepForward pledge

Our StepForward pledge is a promise to continuously improve our sustainability efforts across three key areas:

- People – supporting ethical working conditions and fair treatment across our supply chain.
- Products – expanding our range of sustainable, recycled, and biodegradable merchandise.
- Planet – reducing our carbon footprint through responsible sourcing, eco-friendly packaging, and waste reduction initiatives.

What we're doing to make a difference

We believe that small changes lead to big impacts. Here's how we're working towards a more sustainable future:

- Eco-friendly product range – we offer a carefully curated selection of sustainable merchandise, including products made from recycled materials, organic cotton, bamboo, and biodegradable alternatives. Check it out****
- Reducing waste – we minimise excess packaging and prioritise suppliers who follow sustainable manufacturing processes.
- Carbon footprint reduction – we work closely with suppliers who implement carbon-reduction strategies and environmentally conscious production methods.
- Ethical sourcing – we ensure our products are sourced responsibly, following strict ethical and environmental standards.

***** SUSTAINABILITY FRAMEWORK

SDG 12 – Responsible consumption and production

Policy

- Commitment to sustainable procurement and waste reduction across operations and supply chain.
- Integration of eco-certified, recycled, and ethically sourced products into core catalogue.

Actions

- Appointed a sustainability champion responsible for monitoring procurement sustainability.
- Actively sourcing from local and eco-certified suppliers.
- Eliminating single-use plastics in operations.
- Supplier questionnaire updated to capture sustainability, certifications, and ESG practices.

Results (Targets/KPIs)

- By 2026, 50% of products in our core catalogue will feature eco-certified/recycled products.
- 90% of office waste recycled by 2026.
- 70% of key suppliers (by spend) with sustainability policies in place by 2027.

***** SUSTAINABILITY FRAMEWORK

SDG 8 – Decent work and economic growth

Policy

- Commitment to ethical labour standards, DEI, and safe, fair employment conditions across operations and supply chain.
- No tolerance for forced, or child labour.

Actions

- Annual employee training on ethics, DEI, and health and safety.
- Conducting supplier self-assessments and requiring corrective action where risks are identified.
- Maintaining inclusive leadership practices with strong female representation in management roles.

Results (Targets/KPIs)

- Maintain >40% female representation in management (baseline achieved, continued monitoring).
- 100% employee participation in annual training by 2026.
- Annual supplier compliance rate reported, with follow-ups on corrective actions.

***** SUSTAINABILITY FRAMEWORK

SDG 13 – Climate action

Policy

·Commitment to reducing carbon footprint through energy efficiency, renewable energy sourcing, and sustainable events.

Actions

- Transitioning electricity sourcing to renewable/low-carbon providers.
- Reducing travel emissions through videoconferencing and digital client engagement.
- Tracking and reporting event-related co₂ emissions.

Results (Targets/KPIs)

- 72% electricity sourced from renewables/low-carbon providers by 2026.
- 25% reduction in travel-related co₂ by 2028 (baseline 2023).
- Publish bi-annual sustainability progress report from 2025 including scope 1 & 2 emissions.

bpma
British
Promotional
Merchandise
Association

This is to certify

Has been elected to the membership of the
British Promotional Merchandise Association
and is signed up to the BPMA Code of Conduct,
complying with its high standards for the benefit of the
promotional product industry.

Membership number: **2482**
Member since: **25/11/2009**

Expiry date: **31/05/2026**

Our organisation maintains active membership with the British promotional merchandise association (BPMA), demonstrating our commitment to recognised industry standards and responsible business practices. BPMA membership supports consistent compliance with an established code of conduct, reinforcing our approach to ethical sourcing, product quality, and transparent operations. This affiliation also ensures ongoing access to industry guidance, training, and best-practice frameworks, helping us strengthen our internal processes and align with wider expectations across the promotional products sector.

STRENGTHENING ENERGY EFFICIENCY ACROSS OPERATIONS (BASED ON STEPFORWARD COMMITMENTS 8, 10 & 12)

***** has improved energy efficiency by upgrading core technology and office equipment. We have transitioned to cloud-based systems, reduced reliance on energy-intensive hardware, and introduced laptops in place of older desktop equipment. Our heating controls now operate through an energy-efficient hive system, and we are reviewing energy use through Ecologi zero to establish a full baseline and drive further reductions. These upgrades support our transition to renewable energy tariffs by 2024/2025 and contribute to our long-term net-zero pathway.

Key actions

- Migrated to cloud-based systems to reduce energy demand from hardware.
- Replaced older desktop equipment with energy-efficient laptops.
- Installed hive-controlled heating to improve energy management.
- Introduced digital documentation (e.g., Paperless invoicing) to reduce printing and equipment load.
- Using Ecologi Zero to establish our energy and emissions baseline and guide future efficiency measures

REDUCING EMISSIONS FROM TRANSPORT & LOGISTICS (BASED ON STEPFORWARD COMMITMENTS 1, 6, 9 & 11)

We are reducing transportation-related emissions by prioritising UK and European suppliers, which lowers the carbon footprint of inbound logistics. Our delivery partners are selected based on their use of electric or low-emission fleets, and we continue transitioning our own vehicle fleet to fully electric models. Staff travel emissions are reduced through hybrid working arrangements and increased use of online meetings. Where feasible, we also consolidate shipments and prioritise sea and rail freight to minimise overall transport-related emissions.

Key actions

- Prioritising UK/EU suppliers to minimise long-distance freight emissions.
- Working with delivery providers that operate electric or low-emission fleets.
- Consolidating shipments and prioritising sea and rail over air freight.
- Encouraging remote and hybrid working, reducing staff travel requirements.
- Expanding the use of online client meetings to replace non-essential journeys.
- Transitioning our own fleet to fully electric vehicles.

REDUCING PAPER CONSUMPTION ACROSS THE BUSINESS (BASED ON STEPFORWARD COMMITMENTS 4, 8, 12 & 13)

We continue to reduce paper use by shifting to digital processes, cloud-based systems, and electronic communication. Paper invoices have been eliminated, and shared platforms such as teams and Sharepoint support collaborative working without printing. Staff are encouraged to adopt digital-first habits, reinforcing our commitment to resource efficiency and minimising waste.

Targets

- Maintain 0% use of paper invoices across all departments.
- Reduce total office paper use by 25% by 2026.
- Convert 100% of internal documentation to digital formats where feasible.

INCREASING REUSE & RECYCLING OF OFFICE WASTE (BASED ON STEPFORWARD COMMITMENTS 2, 6, 10 & 12)

We actively promote the reuse and recycling of office waste by keeping all inbound packaging for second use and prioritising reused materials for fulfilment tasks. Items that cannot be reused are recycled through the appropriate waste stream. We also encourage staff to minimise single-use items and have systems in place to monitor how often non-sustainable materials are used, helping us set future improvement baselines.

Targets

- Reuse or recycle 90% of office packaging by 2025.
- Maintain 100% switching to recyclable tape for internal operations.
- Establish a baseline for non-sustainable packaging use and reduce it by 10% year-on-year.

STRENGTHENING INTERNAL WASTE SORTING & DISPOSAL (BASED ON STEPFORWARD COMMITMENTS 2, 10 & 12)

We have established clear internal processes for sorting and disposing of waste according to defined waste streams. Recyclable materials are separated at source using labelled bins placed across all office areas, and staff are supported through regular reminders and training. Packaging from incoming deliveries is stored and reused wherever possible, reducing the need for new materials and helping us minimise landfill waste.

Targets

- Reduce non-sustainable packaging use by 50% over five years.
- Achieve 100% correct use of labelled office recycling bins through staff engagement.
- Reuse at least 80% of incoming packaging before purchasing new materials.

GO PAPERLESS WHEN
POSSIBLE

USE REUSABLE BOTTLES, CUPS,
AND CONTAINERS

AVOID SINGLE-USE PACKAGING

BUY ONLY WHAT YOU NEED

Reporting on Labour Practices	2022	2023	2024
Number of hours worked	11778	13237	12290
Number of days lost to work-related injuries, fatalities and ill health	0	0	0
Number of work-related accidents	0	0	0
Average hours of training per employee	30	30	30
Percentage of women employed in the whole organisation	60%	70%	75%
Number of employee injuries	0	0	0
Number of employees trained on health and safety	0	11	11
Number of employees with healthcare	0	0	0
